Acknowledge

As we understand that the eProject is a step-by-step learning environment that closely simulates the classroom and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e., ladder approach.
- ✓ Build a larger, more robust application.
- ✓ Usage of certain utilities in applications designed by the user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real-life scenario and help to create applications more complicated and useful.

We would like to send a great thank to our professor and others student for the adorable support during the time in the project.

Beside several mistakes we had made in the project, we hope to have more opportunities to widen our knowledge in the web developing world.

We also thank you so much for your information and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning anything as much as we can to be more successful in the future.

Your Sincerely,

Team Group 03.

Synopsis

- The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger, more robust application.
- The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.
- Hence, we can revise the chapters before we start with the project.
- This project The Objective of this program is to give a sample project to work on real life projects. These applications help you build a larger, more robust application.
- The objective is not to teach you the software but to provide you with a real-life scenario and help you create basic applications using the tools.
- You can revise the topics before you start with the project.
- This project is meant for students who have completed the module of HTML5.
- These programs should be done in the Lab sessions with assistance of the faculty if required.
- The website (in this project) is a tool that help the company to access the international market and gain more and more new customers.
- It is very essential that a student has a clear understanding of the subject.

REVIEW 1

Problem Definition

Rheem Cooling is a specialist Air Conditioner retail store. Founded in 1998, Rheem Cooling brings under one roof, multi-brand air conditioning products.

We have over 20 brands in more than 40 stores across.

Rheem Cooling brings alive the promise of a 'Brighter Every Day' with a world-class ambience to shop both in-store and online, while also creating a seamless omnichannel shopping experience that lets you enjoy the best of both, online and offline worlds.

You'll always be spoilt for choice at Rheem Cooling but will never be left confused. Experts at our stores will help you find the right Air Conditioner for your needs.

You are supposed to create a Single-Page-Application and responsive Website for them with the below mentioned requirement specifications.

The website is to be developed for the Windows Platform using HTML5, JSON, Angular JS, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Here are some problems need to be resolved:

1. With the changing environment, more and more customers are interested in shopping online and this issue leads to the situation that customers want to find information about various products easily on the Rheem Cooling website and purchase the right product that meets their needs.
2. The product range is not known to quite a few customers; they just order on the basis of the feedback or recommendations given by their friends or colleagues and after delivery of the product it does not match either the requirements or expectations leading to wastage of time, resources and delivery costs.
3. Online customers have an interest in reading reviews before purchasing specific products.
4. Existing customers needing some help and support on the product after installation would have to contact the Rheem Cooling office through phone number or email address. Moreover, many customers want to come to the store to view the product and then decide whether to buy it or not.

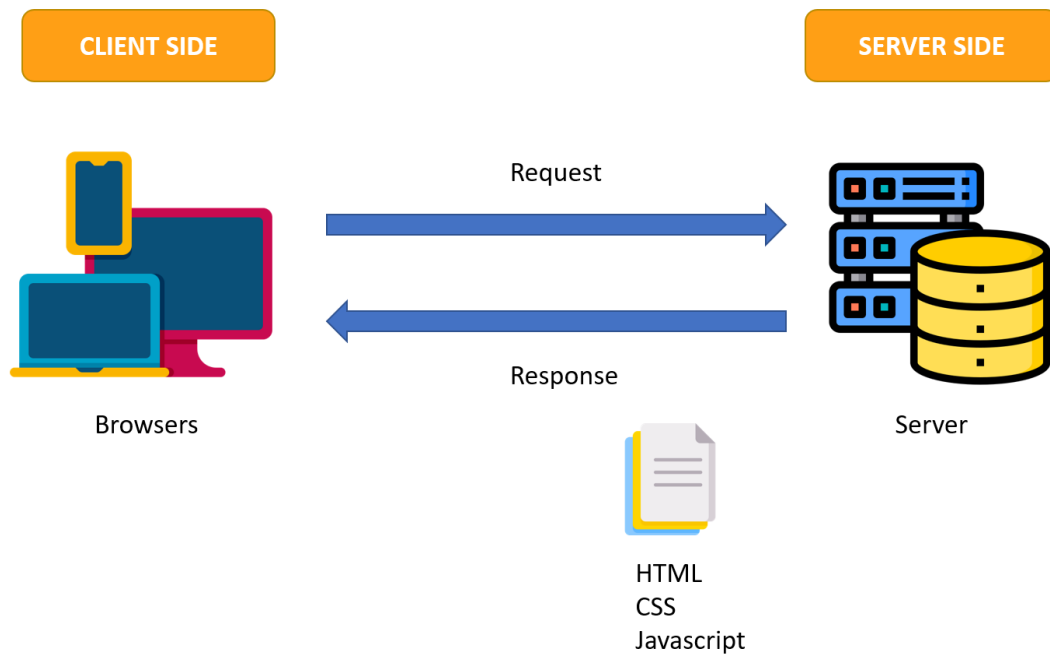

Customer Requirements Specifications

USER:
Input: <ul style="list-style-type: none">● Input consumer's address of residence or office● Send questions/requests to the company
Process: <ul style="list-style-type: none">● Process consumer's address data● Collect questions/requests sent by consumers
Output: <ul style="list-style-type: none">● Show the store address to consumers● Reply to the consumer's requests/questions

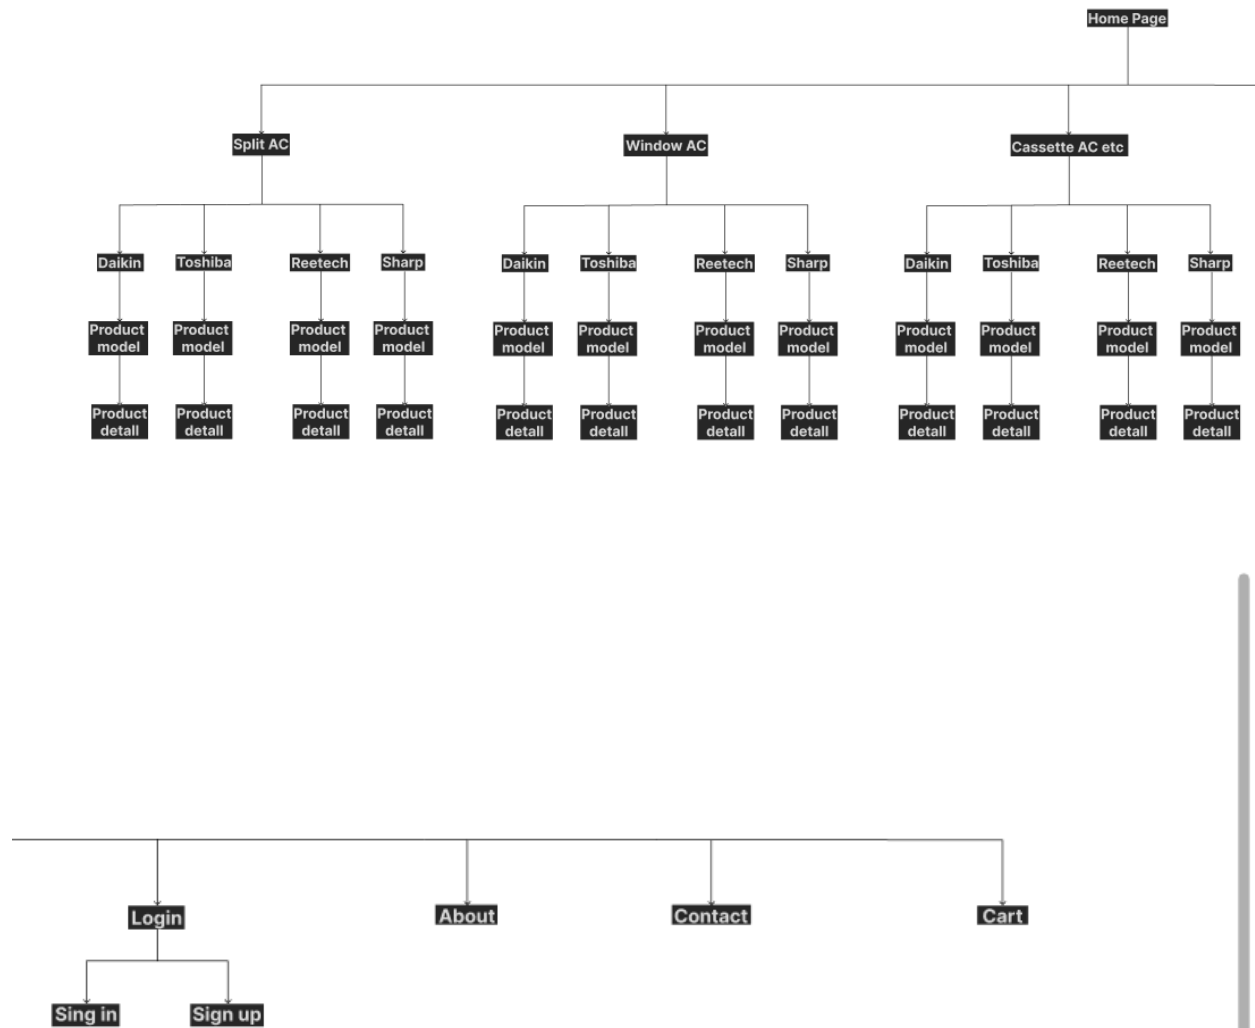

WEBMASTER:
Input: <ul style="list-style-type: none">● Control website database, input product information,...
Process: <ul style="list-style-type: none">● Analyse website
Output: <ul style="list-style-type: none">● Website interface, images, forms, ...● Giving interaction

HARDWARE / SOFTWARE REQUIREMENT:
Software: <ul style="list-style-type: none">● Visual Studio Code● HTML5, CSS, Bootstrap, JavaScript
Hardware: <ul style="list-style-type: none">● A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better● 64 Megabytes of RAM or better

II. Sign in

The screenshot shows the 'Sign In' page of the Rheem Cooling website. The header features a navigation bar with links: Home, All Products, About, Contact, and Sign In. A search bar is located to the right of the navigation bar. The main content area is split into two sections. On the left, there is a large image of a couple dancing in a living room, with a Rheem air conditioner unit mounted on the wall above them. The text 'HIGH PERFORMANCE LOW MAINTENANCE' is overlaid on the image. On the right, the 'Log In' form is displayed. It includes fields for 'User Name', 'Email', and 'Password'. Below these fields is a checkbox labeled 'Remember me'. A blue 'Log In' button is positioned below the checkbox. Below the button, there are links for 'Create Account' and 'Sign Up here'. At the bottom of the form, there are social media icons for Facebook and Google. The footer of the page contains three columns of office information: North Office, West Office, and South Office, each with an address and phone number.
